

PT. MULIA INDUSTRINDO Tbk.

*A reflection  
of quality*

## MULIAGLASS AT A GLANCE

Mulia Industrindo was established on November 5, 1986 and has been listed at The Jakarta Stock Exchange on January 17, 1994.

The company has two operating subsidiaries, namely PT. Muliaglass and PT. Mulakeramik Indahraya located on a 200 hectares site in Mulia Industrial Estate, Cikarang, West Java.

Muliaglass produces float glass, glass containers, glass blocks, and safety glass. Our float glass products are exported to more than 50 countries with export volume reaching 50% of our production. Glass block and safety glass products are also marketed overseas.

On the contrary, glass containers products are predominantly sold in the domestic market, catering to the consumer goods and pharmaceutical industries.

## FLOAT GLASS

Float glass division was established in 1989 with capacity of 612,500 tons annually. We produce float glass in the shade of clear, european grey, dark grey, light green, dark blue, and bronze with a thickness range from 2 to 12 mm. Also reflective glass in dark grey, light green, and dark blue colors with thickness range from 5 to 8 mm.

Keeping in line with our commitment to quality, we have succeeded to obtain ISO 9002 in November 1996 and ISO 19002:1994 in November 1999 (both these ISO versions have been replaced to the latest one that is ISO 9001:2008).

**Our Mission:  
To Be Reliable And  
Preferred Partner**

MULIA CLEAR & TINTED GLASS

# VISTRAN & SOLES

Clear Glass

Tinted Glass

*A reflection of quality*

## DESCRIPTION

Vistran Clear Glass is basically consists of silica sand with added alkaline salts such lime, potash, and soda. It is colorless and has a visible light transmittance.

Soles Tinted Glass is made by adding various colorants to the clear glass batch to create a desired color. Its color density is a function of thickness and increases as the thickness increases, likewise its visible light transmittance.

## SEKILAS

Vistran Clear Glass adalah kaca yang berbahan dasar pasir silika ditambahkan dengan alkali lain seperti kapur, kalium karbonat, dan soda. Kaca ini bening, tak berwarna.

Soles Tinted Glass dibuat dengan menambahkan berbagai macam bahan pewarna pada bahan baku kaca bening untuk membuat warna sesuai keinginan. Warna tersebut akan semakin pekat seiring dengan tingkat ketebalan kaca, demikian pula tingkat tembus cahaya kaca tersebut.

## APPLICATION

Vistran is ideal where high visibility and clarity are required as well as for window, solarium, mirror, safety glazing, sky light, and certainly greenhouses.

Soles is suitable where reduced light transmission and solar heat gain are mostly required or where color is desired to enhance aesthetics and increase design flexibility.

## PENGUNAAN

Vistran cocok untuk penggunaan yang memerlukan tingkat tembus cahaya yang tinggi seperti untuk jendela, beranda, cermin, rumah kaca, dan lain-lain.

Soles digunakan untuk menurunkan tingkat cahaya dan panas matahari atau warna dari kaca tersebut diperlukan untuk meningkatkan nilai estetika dan fleksibilitas dari desain bangunan.

MULIA REFLECTIVE GLASS

# MULIA REFLECTIVE

*A reflection of quality*

## DESCRIPTION

MULIA REFLECTIVE glass is manufactured by online pyrolytic coating wherein a silicon based coating is applied to the glass surface by means of pyrolysis. Also known as hard coating, the process fuses precious metal oxides on the surface of the float glass at high temperature while the glass is in formation.

### SEKILAS

MULIA REFLECTIVE glass adalah kaca yang diproduksi dengan teknik 'online pyrolytic coating' di mana pelapisan berbasis silikon ditempatkan pada permukaan kaca secara 'pyrolysis'. Juga dikenal dengan teknik 'hard coating', proses ini mengaplikasikan metal oxides murni ke permukaan kaca ketika kaca masih berada pada suhu tinggi.

## APPLICATION

MULIA REFLECTIVE glass the ideal glass for many architectural projects, such as office buildings, mixed used buildings, hotels, restaurants, etc.

### PENGUNAAN

MULIA REFLECTIVE glass adalah kaca ideal untuk banyak proyek arsitektural, seperti gedung perkantoran, gedung serba guna, hotel, rumah makan, dsb.

### Mengapa Green

Menyediakan manfaat untuk pembangunan yang berkelanjutan secara menyeluruh:

**Manfaat Ekonomi :** Melalui penghematan energy.

**Manfaat Sosial :** Melalui kenyamanan yang diberikan oleh kaca. (Perlindungan dari panas matahari, dari kebisikan suara dan juga kenyamanan secara visual) dan juga dikarenakan tidak adanya emisi VOC pada kaca maka tidak memberikan dampak yang buruk pada kesehatan penghuni.

**Manfaat kepada Lingkungan :** Cullet 25% dari produksi kaca adalah sumbangan dari cullet (kaca daur ulang), hal tersebut berdampak pada penghematan energy, pengurangan emisi CO<sub>2</sub> dan juga pengurangan dalam penggunaan bahan baku.

### Fitur Produk

- Coating kaca MUREX-MULFLEX diproduksi dengan teknologi Pyrolysis (Online Coating).
- Dapat mengurangi panas yang masuk kedalam gedung dengan sangat baik.
- Memberikan daya tarik estetika yang tinggi.
- Dapat mengontrol panas matahari yang masuk kedalam gedung dengan baik.
- Tingkat kesilauan yang rendah.
- Tahan terhadap goresan.
- Mudah dalam proses lanjutan (tempered - laminating).
- Memiliki daya tahan coating yang kuat dan tahan lama.

# Neutrals

Neutrals breathe light and purity, innocence and goodness. Some architects consider neutrals as the colour of perfection. Structures swathed in neutrals depict cleanliness and clarity of thought. Most often building that represent faith and healing are bathed in neutrals.

# Metals

Metals are associated with power and grace. Shining sheets of metallic glass impart elegance and class. While its sheer appearance looks futuristic and hi-tech, it adds finesse and stands out in the midst of today's dull concrete jungles. Modern architects use metals to add attitude to their creations.

# Greens

Green is the colour of nature. It symbolises growth and harmony. Big structures of green have an emotional correspondence to safety. Green is also the colour of life.

Architects use green for buildings that represent man's basic need for shelter.

## Blue Green

Blue Green is most known for its calming tones. Refreshing while providing a serene environment, it also represents safety and emotional well-being. Architects mostly choose this colour for its duality.

# Blues

Blue represents the sky and the sea. Creating in the mind vast expanses of space and cascading waves of freshness. A colour to weave strokes of calmness to relax the mind and body. Blue often

represents depth and stability and also tranquility and calm. Blue edifices stand tall and proud, yet are soothing to the eye.

### Mengapa Green

Menyediakan manfaat untuk pembangunan yang berkelanjutan secara menyeluruh:

**Manfaat Ekonomi :** Melalui penghematan energy.

**Manfaat Sosial :** Melalui kenyamanan yang diberikan oleh kaca. (Perlindungan dari panas matahari, dari kebisikan suara dan juga kenyamanan secara visual) dan juga dikarenakan tidak adanya emisi VOC pada kaca maka tidak memberikan dampak yang buruk pada kesehatan penghuni.

**Manfaat kepada Lingkungan :** Cullet 25% dari produksi kaca adalah sumbangan dari cullet (kaca daur ulang), hal tersebut berdampak pada penghematan energy, pengurangan emisi CO<sub>2</sub> dan juga pengurangan dalam penggunaan bahan baku.

COOL LITE - EVO didistribusikan oleh PT. MULIA INDISTRINDO.

### Fitur Produk

- Diproduksi dengan melapisi permukaan kaca dengan lapisan metalic secara magnetis di dalam kondisi ruang hampa udara.
- Memiliki perfoma dan spesifikasi yang tinggi.
- Tingkat kesialuan cahaya yang rendah.
- Transmisi cahaya yang optimum.
- Mudah dalam proses lanjutan.
- Pemilihan warna dan performa yang bervariasi.
- Dapat di proses tempered, laminasi dan bending.

### APPLICABLE GREENSHIP CREDITS

- NB** MRC 2, MRC 5, MRC 6, IHC 4,  
IHC 6  
**EB** MRC 2  
**IS** MRC 4, IHC 7, IHC 8

### OTHER RATING

Product Green/Eco Labels and Accreditation Obtained :  
EBC COMPLIANT ; Indian Green Building Council, FOUNDING MEMBER

Other Product Compliance / Labels Obtained:  
- ISO 9001:2008  
- ISO 14001:2004  
- SNI 15-0047-2005

NANO-ENVISION-EXTREME didistribusikan oleh PT. MULIA INDISTRINDO

### Fitur Produk

- Diproduksi dengan melapisi permukaan kaca dengan lapisan metalic secara magnetis di dalam kondisi ruang hampa udara.
- Memiliki warna yang netral.
- Transmisi cahaya yang tinggi.
- Mereduksi panas matahari yang masuk kedalam gedung dengan baik.
- Tingkat refleksi cahaya yang sangat rendah.
- Kombinasi pengendalian dan insulasi panas matahari berteknologi tinggi.
