Viridi & Viridi+

The latest composite wood technology that looks and feels like natural wood, is weather-resistant, termite-resistant, anti-deformation, and does not change color.

Sustainability

For the sake of a sustainable environment, all Viridi and V+ raw materials are recycled wood and plastic.

Natural Look

Many composite decking products still look like plastic. Viridi and V+ have been crafted and designed to look and feel like natural wood.

Care & Cleaning

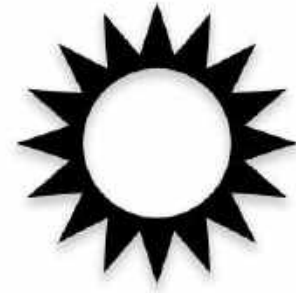

Viridi and V+ care and cleaning uses only hot water and liquid soap.

Benefit Summary

Here are the range of benefits when using our products.

No Oiling or
Painting Required

SMART COMPOSITE TIMBER

In 2017, we established our company with a mission to limit the overconsumption of wood and plastic that contributes to excessive air pollution. In the long run, it will be extremely harmful for the wellbeing of our environment. From this, we aim to stand out from other brands by making it possible to create long-lasting premium composites out
